#### **Job Description**

The Pharmacists, whether onsite or remote, will ensure safe and effective medication use, optimize therapy outcomes, and promote patient education and adherence.

#### **ROLES and RESPONSIBILITIES**

- Review written medication orders and prescriptions as well as those submitted electronically or through telehealth platforms to ensure accuracy, appropriateness, and compliance with regulatory requirements.
- Provide medication therapy management (MTM) services, including drug information, clinical assessments, and recommendations to optimize therapy outcomes and minimize adverse drug reactions.
- Conduct virtual medication counseling sessions with patients to discuss medication instructions, potential side effects, drug interactions, and adherence strategies.

- Collaborate with healthcare providers to reconcile patients' medication histories, identify discrepancies, and develop medication reconciliation plans to promote medication safety and continuity of care.
- Perform drug utilization reviews (DUR) to identify potential medication errors, duplications, contraindications, and therapeutic interventions and communicate findings to prescribers and patients.
- Process medication orders, dispense prescriptions, and coordinate medication delivery or pickup through mail-order pharmacies, automated dispensing systems, or e-prescribing platforms.
- Monitor patients' medication adherence through remote medication management tools, patient-reported outcomes, and assessments, and intervene to address adherence barriers.
- Ensure compliance with pharmacy laws, regulations, and standards of practice, including remote dispensing regulations, patient privacy laws (e.g., HIPAA), and medication safety guidelines.
- Provide tele-pharmacy services to patients and healthcare providers, including medication counseling, refill authorizations, prior authorization assistance, and medication therapy management (MTM) reviews.
- Maintain accurate and up-to-date records of medication orders, interventions, communications, and clinical assessments in electronic health records (EHR) or pharmacy information systems.

#### **QUALIFICATIONS and REQUIRED SKILLS:**

- Minimum of 5 years of experience as a licensed pharmacist, including experience in tele-pharmacy or remote pharmacy practice settings.
- Current and unrestricted pharmacist licensure in the state(s) where you intend to practice pharmacy, with eligibility for licensure in multiple states if providing services across state lines.
- Certification or training in remote pharmacy practice, tele-pharmacy, or telemedicine platforms.
- Previous experience in clinical pharmacy practice, medication therapy management (MTM), ambulatory care, or telehealth is beneficial.
- Strong understanding of pharmacology, pharmacotherapy, and clinical guidelines to assess medication appropriateness and optimize therapy outcomes.
- Excellent verbal and written communication skills to interact remotely with patients, healthcare providers, and interdisciplinary teams.
- Comfort using telemedicine platforms, electronic health records (EHR), pharmacy software systems, and communication tools for remote consultations and medication management.

- Ability to analyze medication-related problems, identify solutions, and make evidence-based recommendations to improve patient care remotely.
- Empathy, compassion, and patient-centered approach to counseling patients, addressing their concerns, and promoting medication adherence remotely.
- Keen attention to detail and accuracy in medication review, documentation, and communication to ensure patient safety and regulatory compliance.
- Effective time management and organizational skills to prioritize tasks, manage workflow, and meet deadlines in a remote pharmacy setting.

## EDUCATION

- Doctor of Pharmacy (PharmD) degree from an accredited pharmacy school.
